La vaccination est un droit de tous les citoyens .

La maladie naturelle peut causer des complications jusqu'à la mort.
La vaccination est une procédure sûre qui garantit la protection.
La vaccination peut contrôler les maladies voire même les éliminer.

Measles

IT ISN'T JUST A LITTLE RASH

Measles can be dangerous, especially for babies and young children.

MEASLES SYMPTOMS TYPICALLY INCLUDE

- High fever (may spike to more than 104° F)
- Cough
- Runny nose
- Red, watery eyes
- Rash breaks out 3-5 days after symptoms begin

Measles Can Be Serious

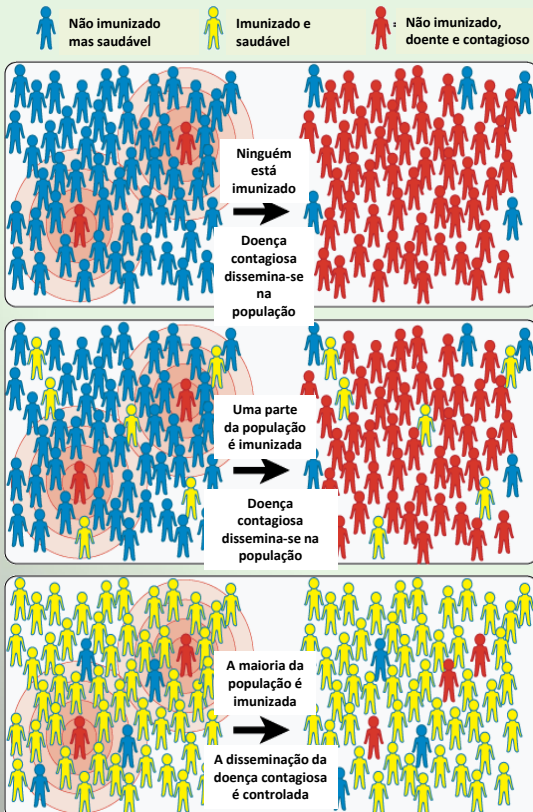

- About 1 out of 4 people who get measles will be hospitalized.
- 1 out of every 1,000 people with measles will develop brain swelling due to infection (encephalitis), which may lead to brain damage.
- 1 or 2 out of 1,000 people with measles will die, even with the best care.

You have the power to protect your child.

Provide your children with safe and long-lasting protection against measles by making sure they get the measles-mumps-rubella (MMR) vaccine according to CDC's recommended immunization schedule.
